OAU Student Complaint & Communication Survey

Understanding students' experiences with campus complaints and official feedback

Introduction / form description

We are OAU Peer Cluster 4, working on a design-thinking project exploring how students report campus-related complaints and receive feedback from the university. This short survey asks about your experiences and opinions. It is for research and project development only; it is not an official university complaint channel. Participation is voluntary. Please do not include names, student numbers, phone numbers, or details that could identify you or another person. Responses will be reviewed in summary form for our project presentation. You may skip any question you do not wish to answer.

Closing note

Thank you for sharing your perspective. Your responses will help our team better understand students' needs and design a solution grounded in real experiences.

Google Forms setup notes (for the team)

- Suggested title: OAU Student Complaint & Communication Survey
- Suggested settings: do not collect email addresses; do not require sign-in unless your research plan specifically needs it.
- Make Questions 3, 4, 6, 7, 8 and 10 allow a "Not applicable" or "Prefer not to say" response where appropriate.
- For Question 11, create a Multiple-choice grid and allow one response per row.
- Keep Question 15 optional and avoid asking respondents to identify themselves or name other people.
- Before sharing, test the form on a phone and ask one or two people to check that the questions are clear.

How to use the results in your pitch

After collecting responses, report only the results you actually observe. For example: "Among the [N] students who responded, [n] ([%]) said it was difficult or very difficult to track a complaint." Include the sample size and avoid claiming the responses represent all OAU students unless the sampling method supports that conclusion. Use the findings to refine the prototype; do not present willingness to use a portal as proof that the portal already works.
